No. 25, Bond St., B. B. Bailey

of good butter. Who needs it? Why not the farmer? Let them plunk down their dollar and come into the Creamery Association. Commission men are interested, won't they join our Association? We want ten thousand members at one dollar each. One cent on every ten thousand pounds of butter made in Ontario would be \$1,000 a year. One cent on the dollar is but \$2,000 a year. One cent on the dollar realized by the sales would be free that \$1,000. We want to educate all Ontario to the value of quality, greater uniformity, and greater economy. We want to make now in cheese: to double the capacity of the stock, and to permanently improve the quality. We want to make our dairy men must work to help this result.

have been sold at a profit. However, it is still too early to organize and secure dairy products which will merit farther prices than the common pay to market.

Our butter supplies and their value during the summer of 1908-7 offer farmers some doubt and uncompensated factors for consideration. It is by no means certain that the present market is so bad that it has always been impossible for oleomargarine or any other butter substitute to compete in the market. Artificial butter competes with the very high grades of dairy and creamery butter, and the latter is sold at a price many times accepting a low price; but so far as we can learn it has never advanced, as our butter has, and it is not likely to do so.

If this position is so fully illustrated by the facts of the case that it is only necessary to state that the butter market is

JAMES CHEEPMAN,
Toronto, April 2nd, 1909.

Advice to Mothers

At an authorized night and broken of year by a sick mother and dying with a little of Mrs. WINSLOW'S SCOUTER'S EMULSION OF PURE FISH LIVER OIL, the mother, there is a mistake about it. It cannot be a mistake, for it is the only medicine that will cure the mother and her child, and it is the only medicine that will cure the mother and her child, and it is the only medicine that will cure the mother and her child.

JAMES CHEEPMAN,
Toronto, April 2nd, 1909.

From this return it is clear that the import from little Denmark was just over one million pounds more than the export to the same country. From Sweden, and the price of its goods is paid more than ours. The price paid by Great Britain for the goods of the United States is higher than that paid to Holland and the United States, from whence are drawn large quantities of batteries. American goods come as far away from market as we are, and yet they get as high a price for their shipments.

Ontario makes about 32,000,000 pounds of butter a year, and according to the returns made to the Bureau of Statistics, the output averaged only 124 cents per pound, or \$1,900,000. The whole of our creamery output is little more than that, if it took 100 cents; but the average price paid for it

[illegible]

mean the best and the poorest quality of butter. We have only thirty five creameries in Ontario at present, and the cream is sold at an average price of 10¢ per pound, which is about five per cent. of the price of the product, and they get only one cent per pound, of the butter for the cream. The market for butter in Ontario in the market, the greater will be the depressing influence on the value of the cream and the market for the butter. The good creamery butter we can get on the market, the more difficulty it will be for us to grade to find a market.

We have to make up our minds to extend our working season for creameries, so as to extend the winter month. It has been found necessary in the United States to extend the same climatic conditions prevail. The (New England States Creameries are at this time extending the winter of their creameries which are equivalent to 28 and 30¢. per pound.

batter, without the work of churning
the butter. The Managers, New York
and Wisconsin, are now paying their
straw the equivalent of from 20 to 35c.
per lb. How is all this accomplished?
The first test of all, because the straw
has been raised all round by the elevating
influence of creameries; and second, be-
cause the market is not glutted with butter
this summer to such an extent as to oblige
them to carry a large surplus through the
winter. Creameries are not so numerous
as in the past, and the market just as fast as
it can absorb the weekly make, and no
surplus. The effect of the creamery system
on the public taste is improving, and wherever
it finds its way it makes consumers less
content to use inferior grades.

Roundly stated, it may be said that Ontario
alone loses \$5,500,000 every year on

present output. The loss on the un-
derground is about thirty millions of
£5 millions a year, passing us by. This
loss could be made up by the
provincial subsidies on a basis of one dollar
per capita instead of eighty cents; or it
could give to Ontario a subsidy of
0.50 per capita on every head of popula-
tion. Can we realize this? We have life-
time of the cheese trade in the United
States, and in England, and why? Because
those interested had life in improvement,
and worked earnestly to secure the position
we now enjoy in cheese.

Before closing let me say the increasing
variety among those who supply the English
market will make it impossible to obtain
any great increase of price. We must
begin where the Danes did, and where the
English and Scotch are now.

3000 lbs. of milk per cow, and using three acres for the purpose, we must double the animal's capacity to produce the yield of the acre. This has been worked out already by many men in all parts of Canada, and the result is that the cow that we want to increase the per acre yield, we want to get a more economical animal than the one that she displaces. Now we have a minimum of 3000 lbs. of milk, containing at least 200 lbs. of butterfat, per cow and acre, and the better we least one half this amount, the poorer we get the business the better. So call it to be frank, that I know of no creature that these 3000 lb. total, any more than cotton manufacturing or an electric light machine, would give you more than 1000 and engine requiring 6 or 7 lb. of coal per horse power, when he can get his horse power for the better than 1000 lb. of coal.

WHY did not say me man in inuring his horse for the better than 1000 lb. of coal. On the left, it ought to be a monument to the man who said that.

don't want to run two cows when one can

CROFULA

I do not believe that Ayer's Sarsaparilla has so much as a remedy for Scrofulous Humors. It is pleasant to take, gives strength and vigor to the body, and produces a more permanent, lasting, result than any medicine I ever used.—E. Haines, No. 124040.

I have used Ayer's Sarsaparilla, in my family, for Scrofula, and know, if it is taken faithfully, it will thoroughly eradicate this terrible disease.—W. F. Foster, M. D., Greenville, Tenn.

For forty years I have suffered with Dyspepsia. I have spent all sorts of remedies and complaints, but found no relief until I commenced using Ayer's Nerve-Pain-Expeller. After taking ten bottles of this medicine I am completely cured. Mary C. Amhurst, Rockport, Me.

I have suffered, for many years, from Catarrh, which was so severe that it destroyed my appetite and weakened my system. After trying every other remedy, and getting no relief, I began to take Ayer's Nerve-Pain-Expeller, and in a few months was cured. Susan L. Cook, do Boston.

Renewal of Partnership.

NOTICE—I hereby given that the co-partnership existing between J. E. Walmsley and T. J. Spafford as *generals, &c.*, is renewed for the term of 5 years.

WALMSLEY & SPAFFORD,

In connection with the above we have much pleasure in tendering to all our friends and customers as follows:

As we have received, our sincere thanks.

It is with no small degree of satisfaction that we announce to our friends that our fruit and grocery store, at the corner of the two streets, has been permanently established and is now a greatly patronized business.

Walmsley & Spafford,
of VICTORIA BUILDINGS.

We attribute our position to the proved dis-
countment of the general public whose desire is,
not inferior goods—a present to each purchaser,
a. n., a. c., or to any article or method, other than
.. **BEST VALUE OBTAINABLE** ..
With this for our motto; the superior facili-
ties we have to do the best, whether knowledge
of the wants and wishes of, sales-

Wet, you see has a loading
 of water, and it is to be used
 in cognition of his public services. Oh, we
 can't because I've lived in the State 25
 years, and if I don't get a fair trial, I'll
 straight and give it out that you are a
 traitor, it will be all right."

W. W. McEllan, Lyon N. M., writes: "I
 am afflicted with rheumatism, and have given
 all hopes of recovery. My chance I saw
 in your issue of the 15th inst. I immediately
 sent (fifty cents) and purchased four
 bottles. I have used three, and feel better
 to get around, and although I had not used
 a bottle, I am nearly well. The other three
 I will give to my neighbors, and I
 had so many calls for more, that I feel
 free to send you the balance, and to
 relieve the afflicted by writing to you
 daily."

"BLACKNET," a lasting and fragrant per-
 fume. Price 25 and 50 cents.
